In the Claims:

16. (amended) A purified aggrecanase polypeptide produced by the steps of

REMARKS

Applicants hereby elect Group V (claims 14 and 16) for prosecution in the present application with traverse. As stated in the MPEP at §803, "If the search and examination of an entire application can be made without serious burden, the examiner must examine it on the merits, even though it includes claims to independent or distinct inventions." The search and examination of this application do not constitute a serious burden because of the close relationship among the sequences. Applicants therefore request that the restriction requirement be withdrawn.
